Chen Dongtian

Software developer focused on healthcare systems, applied AI, backend delivery, systems integration, and long-term system maintenance.

Wuhan, Hubei, China • (+86) 189 8614 5582 • cdt86915998@gmail.com

Experience

Tongji Hospital of Huazhong University of Science and Technology | Wuhan, Hubei, China

Senior Software Developer | *Jan 2024 - Present*
Software Developer | *July 2016 - Dec 2023*

- Maintain electronic medical record and related clinical systems, covering requirements analysis, troubleshooting, data-interface integration, and continuous improvement
- Build clinical search, reporting, internal management, and third-party healthcare integrations with Node.js, Vue.js, Oracle, SQL Server, Redis, and S3
- Developed a clinician-facing AI assistant on DeepSeek/OpenAI-compatible APIs, using server-side tool calls over medical records, orders, laboratory results, and examination reports, with SSE streaming, context controls, usage management, and API tests
- Designed a retrieval-grounded institutional knowledge assistant with document search, source citations, structured answers, explicit refusal paths, audit records, and human confirmation
- Designing internal AI agents built on the Model Context Protocol (MCP), covering natural-language data queries, Oracle/PostgreSQL/GaussDB performance diagnosis, and IT helpdesk support, with read-only data access, cited answers, role-based permissions, and audit logs (in development)

China Southern Asset Management Co., Ltd. | Shenzhen, Guangdong, China

Software Developer Intern | *July 2015 - Aug 2015*

- Built an API management system with REST API backend based on Spring Web MVC + Hibernate + Hadoop
- Developed frontend interface using Bootstrap + jQuery

Wuhan Rural Commercial Bank | Wuhan, Hubei, China

Test Engineer | *Sept 2013 - Aug 2014*

- Conducted performance tests on banking information systems and wrote comprehensive test reports
- Developed transactions for banking business systems

Education

Wuhan University | Wuhan, Hubei, China

Master of Engineering in Computer Technology | *Sept 2014 - June 2016*

Bachelor of Engineering in Computer Science and Technology | *Sept 2009 - June 2013*

Technical skills

- **Generative AI and LLM applications** - Prompt design, structured outputs, multi-turn orchestration, and server-side function/tool calling
- **Retrieval-grounded AI** - Document retrieval, source citation, grounded-answer enforcement, and explicit refusal/fallback flows
- **AI platform integration** - DeepSeek and OpenAI-compatible chat APIs, SSE streaming, context and token management, and usage quotas
- **AI safety and quality** - Prompt-injection filtering, patient-scoped data access, human-in-the-loop workflows, audit logging, and mocked integration tests
- **AI-assisted software development** - Requirements-driven implementation, code review, debugging, refactoring, and test generation
- **Software testing** - Functional, integration, performance, and API testing
- **Node.js, JavaScript, and TypeScript**
- **Vue.js and React**
- **REST API development and integration**
- **SQL, Oracle, SQL Server, and Redis**
- **Git and GitHub**

Languages

- **Chinese** - Native
- **English** - Proficient (IELTS Academic 7.5, Duolingo 145)
- **Japanese** - Proficient (JLPT N1)

Certifications

- IELTS Academic - Overall Band 7.5 (2023)
- Duolingo English Test - Overall Score 145 (2022)
- Japanese-Language Proficiency Test N1 (2021)
